

Town of Brentwood, N. H.

Minor Projects

Residential Demolition Permit Application

Owner Name _____

Owner Address _____

Owner Phone # _____ Cell Phone# _____

Site Address _____

Contractor Name _____

Contractor Address/Phone # _____

Proposed Project: (describe in detail the work proposed to be done - use another sheet if necessary)

Demo Co. _____

Disposal Site _____ Estimated Cost: \$ _____

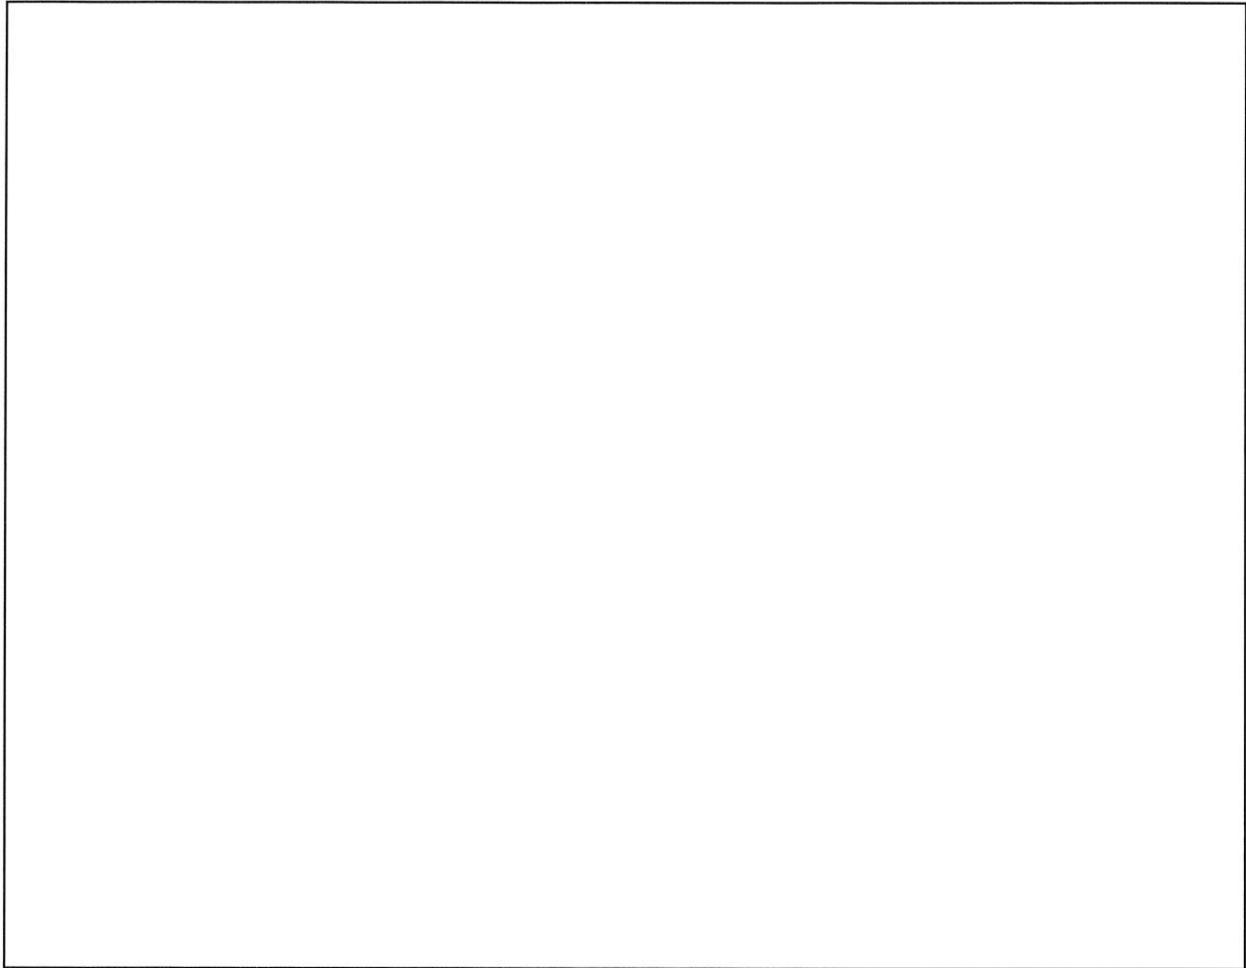

Map _____ Lot _____ Fee \$ _____

Note: A check made payable to the "Town of Brentwood" must be submitted with the application. Application fee is A minumum of \$50 Any balance due must be paid prior to the permit being released to the applicant.

The N. H. Department of Environmental Services and Brentwood Health Officer must be notified at least ten working days before any demolition activity occurs, whether or not asbestos of any amount is present. For renovation projects, the N. H. Department of Environmental Services and Brentwood Health Officer must be notified at least ten days prior to any asbestos abatement project involving greater than ten linear feet or 25 square feet of asbestos-containing building material. (RSA 141-E)

EPA Lead Abatement (Renovation, Repair & Painting) Rule:
Was this structure built prior to 1978? YES NO If yes, EPA Certified Renovator: _____ Phone: _____
 No lead based paint will be disturbed
 Project is less than 6 sq. ft. per room (interior) or 20 sq. ft. (exterior)
 Abatement Required

Sketch the proposal below, including dimensions, and indicate the distance from the structure to property lines, existing structures, etc.

Applicant is responsible for following all state and federal regulations.

Owner's Signature: _____

**ASBESTOS ABATEMENT
INSPECTION AND NOTIFICATION REQUIREMENTS**
Asbestos Management Program- Air Resources Division

Background.

Asbestos is a naturally occurring, mineral fiber, which due to its high tensile strength and insulating qualities, was used in the manufacture of thousands of products. Many of these products were used in the construction of buildings, including insulations, surfacing materials, flooring, siding, and roofing. Asbestos fibers however, are a human carcinogen, and their use has been strictly controlled since the 1970's.

The greatest potential for exposure to asbestos fibers now occurs when asbestos containing building materials (ACBM) are disturbed during either building renovations or demolition. RSA 141-E and Chapter Env-A 1800, Asbestos Management and Control Rules were promulgated to address this potential hazard, and they require that building owners and contractors take certain steps to identify and address asbestos hazards in structures prior to beginning any work that might disturb asbestos containing materials.

Specifics.

Inspections. Env-A 1804.01 requires that a thorough inspection be conducted for the presence of asbestos containing building materials(ACBM), prior to any demolition or renovation, in the affected portions of the facility. The inspection must be conducted by a person competent in the identification of ACBMs. A list of qualified inspectors can be obtained by calling the NH DES Asbestos Licensing Program at 603-271-4609.

Notifications. Env-A 1803 requires each facility operator to provide written notification to the NH DES Air Resources Division, and the local health officer, at least ten (10) working days before any demolition activity occurs, regardless of the amount of asbestos present, if any.

Written notification is also required ten days prior to any asbestos abatement activity conducted as part of a renovation, if it involves greater than 10 linear feet, or 25 square feet of ACBM. A fee may be required depending on the amount of asbestos being removed. Notification forms can be obtained by calling the Air Resources Division, Asbestos Program, at 603-271-1370, or from the DES website at www.des.nh.gov.
